## General Login and Navigation

isolved is committed to protecting your data. All users are required to use Two - Factor Authentication (2FA) with every login to isolved.

### Logging in

Navigate to the isolved Adaptive Employee Experience (AEE) website using a web browser of your choice.

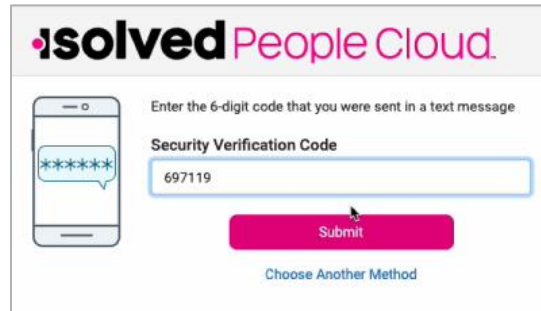

The screenshot shows the login interface for isolved People Cloud. At the top, the logo reads "isolved People Cloud." Below it, a "Welcome" message says "Log in to access isolved People Cloud applications". There are two input fields: "Username" with the value "doemanager@protonmail.com" and "Password" which is currently empty. To the right of the password field is a toggle for visibility and a "or" option with a user icon. A link "Forgot my password" is located below the password field. At the bottom, there are two buttons: a pink "Log In" button and a white "Back" button.

Key in your username and password and select **Log In**.

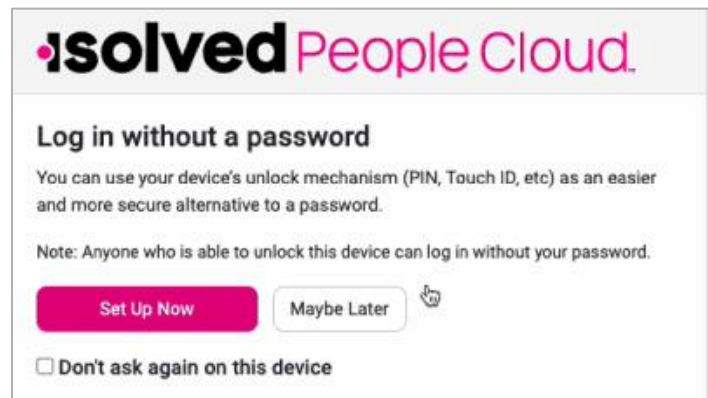

The screenshot shows the verification step of the login process. The header is "isolved People Cloud." The main text says "Please verify your account by selecting one of the methods below:". There are two radio button options: "Email: doemanager@protonmail.com" and "Text Message: (###) ###-4508". The "Text Message" option is selected. Below the options are two buttons: a pink "Request Security Code" button and a white "Cancel" button.

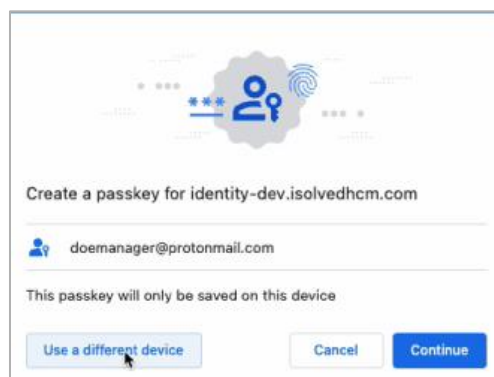

Select a verification option, select **Request Security Code**.

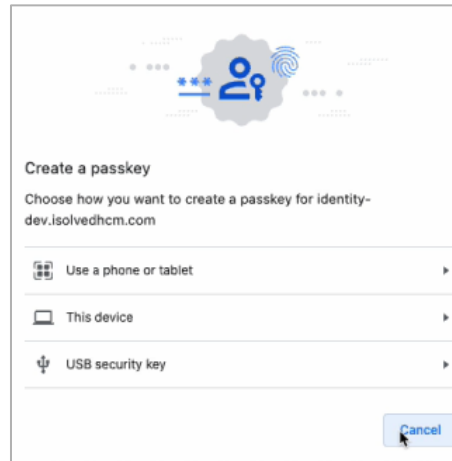

Use the code you receive, or you can select **Choose Another Method** to receive the code to the other verification option. Select **Submit**.

**Set Up Now** allows you to setup your passwordless option. You can make changes to this at any time when logged into isolved & you select the drop down under your name, select **My Account**. Once this is set up, future logins will use what you have added for your options. You may be able to use FaceID, Thumbprint, Passcode, PIN, or other options present on your device:

**Maybe Later** allows you to set up the password-less criteria later. This does not allow you to bypass the multifactor authentication process.

Select **Don't ask again on this device** if you don't want this message to show up again. This does not allow you to bypass the multifactor authentication process.

Going forward, you can log in to your account by either of these methods:

- Entering your password (this option requires entering a code sent to your email or phone).
- Selecting the icon for passkey when you log in to isolved which allows you to use the passkey you enabled for that device.

## Commonly Asked Questions

**What if I don't remember my password?** Use the Forgot Password option.

**What are the key features and functionality?** We now offer MFA options outside of email and text messaging. 2FA requires a user to validate their identity with two or more forms of evidence or factors when they log in. We are enforcing a minimum of two. One factor is something the user knows, such as their username and password combination. Other factors are verification methods that the user has in their possession.

**Can a user have passwordless access on multiple devices?** Yes, each device will allow and recognize what was set up on that device and use that as a default. Some passwordless options can be used on multiple devices.

**What might a user expect this to do that it does not?** The user may expect to not do this every login if they are on the same device, a registered IP address, or have logged in within the same day – however, they will still need to do some method of 2FA regardless. This could be different than what they are used to today depending on the system settings per client.

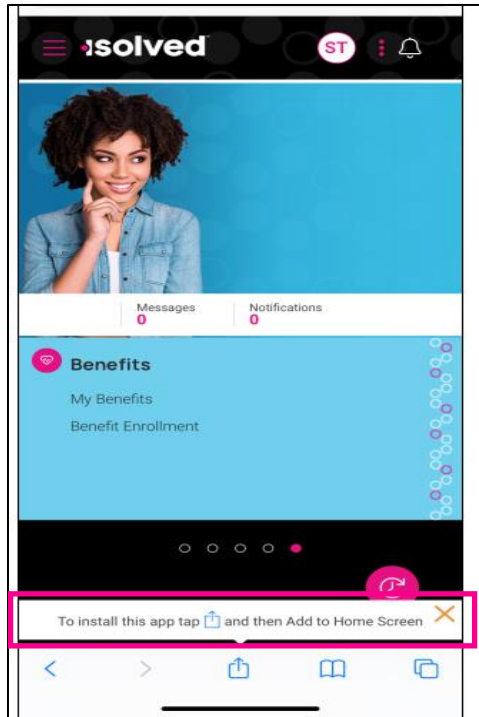

**Can we opt out of the multi-factor authentication?** No

## Logging in on a SmartPhone

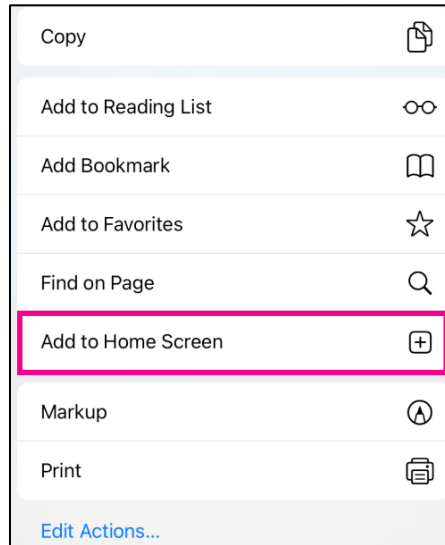

You may log in to AEE on a mobile device in two different ways:

1. Log into ESS and select the “Try our new look” link.

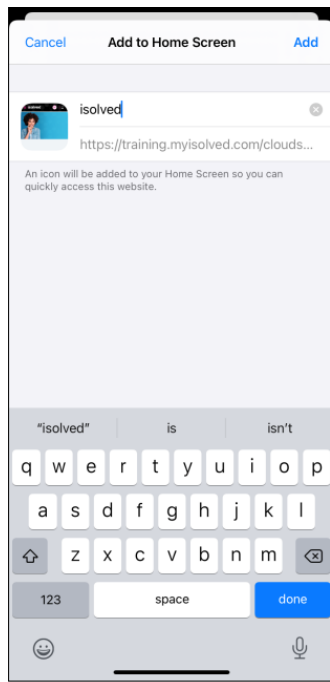

The screen below appears:

2. Key in the URL of the ESS plus “/cloudservice.com.” This opens AEE where you can select to add it to your Home Page (see above image).
  - a. For example, my normal ESS login is <https://mysolved.com>. For AEE I would use <https://mysolved.com/cloudservice>.
  - b. Select if you'd like to add to the home screen:

After you select the “Add to Home Screen” option, the screen below becomes available:

Click **Add** at the top of the phone screen.

### Self-Service Punching

Once logged in, you can immediately create a punch by using the pink  symbol located at the top-left corner of the page, as seen below. In this menu, a punch can be created using two different methods:

#### Quick Punch

If you select “Quick Punch,” the system immediately brings you to a page to create a punch for the current date and time, without the option to add punch notes or any other punch options. Once the page loads click the pink  to create the quick punch. Once the punch is created you will see a punch confirmation on the screen as shown below:

**Detailed Punch**

If you select “Detailed Punch,” the system opens a creation screen and displays the current date and time.

**Note:** The **Date** and **Time** fields are not editable during Self-Service punching. The punch options available in the detailed punch screen are as follows (options on this screen may differ based on your company permissions).

- a. **Type:** Allows you to specify the Punch Type for the entry. The options are “Normal,” “Meal,” and “Break.”
- b. **Mode:** Allows you to specify if the punch is an “IN,” “OUT,” “AUTO,” or “TRANSFER.”
  - a. **IN** means you are clocking in and is typically used when you are first in for the day or coming back from a break or meal.
  - b. **OUT** means you are clocking out and is typically used when you are leaving for the day or leaving for your break or meal.
  - c. **AUTO** allows the system to determine the status of the punch.
  - d. **TRANSFER** allows you to move from one labor value to another without having to create multiple punches. When using the transfer option isolved creates two punches; one clocking you out of your current labor and one clocking you into the labor you transferred to.
- c. **Labor:** If the option to enter labor allocations is enabled, select from the allowed labor levels when creating a punch. If no labor is selected, isolved uses your default labor allocation.
- d. **Notes:** If notes are entered, anyone looking at the Time Card is able to view the details.
